

## SRS

Voltage controller

Nominal voltage	<b>230 V (400 V, 500 V) ~</b>
Nominal current	<b>6A</b>
	<b>15 A</b>
	<b>25 A</b>
Setting range voltage	<b>20 .. 220 V (40 .. 380V)</b>
Temperature range	<b>0 .. 55°C</b>
Input signal	<b>4-20 mA</b>
Dimensions	<b>Euroboard 14 TE /3 HE</b>

Voltage controller compact unit

SRS

### Voltage controller

This controller is designed for the voltage control of electrical heating systems. Different constructions make the optimal operation in a control cabinet possible. With the optimal mounting enclosure also suitable for the individual use. Variable voltage control or also available as constant voltage transmitter.

Input also as Y- signal

### Warning

The installation, configuration and commissioning may only be carried out by accordingly trained persons. The local installation and safety regulations must be respected.

Read through this operating manual carefully, before you take the device into operation. Keep the operating manual at a place accessible to all users at any time.

Please support us to improve this operating manual.  
We are grateful for your suggestions.

Please contact us for technical queries!  
TELEPHONE: +49 (0)611 94587267  
TELEFAX: +49 (0)611 94586124  
E-Mail: info@erich-ott.de

### Reservation

We reserve the right for technical changes. Aberrations and printing errors do not constitute grounds for any claims to damages. For safety components and systems the relevant standards and regulations as well as the according instruction manual and the assembly instructions should be observed.

### Repair

Dismantling takes place in reverse order than the installation. A Repair of the device is not possible concerning the switching element. All other repairs may only take place in the factory of the manufacturer. The basic devices (Inserted parts without terminal box) are, capillaries excluded, irreparable. These may only be changed in the factory. An intervention is not permitted.

Changes, that modify the design of the device, will cause that the validity of the certificate and any claim for damage void.

## 1.0 DESCRIPTION

### Characteristics

Easy installation
Effective constant current transmitter
Current transformer output
Effective value display

These devices are used for voltage control. By use of the voltage controller the effective current for the heating is adjusted. The adjustment is controlled at the ampéremeter and if necessary monitored at min. current via TRB-Pie.. or rather TRB-PI.

- Constant output voltage by control to the adjusted setpoint value
- Activation and deactivation via optocoupler (VDE 700 - 730)
- Current transformer output (according to VDE 0551)
- Effective value display
- Regulating variable for analog controller (y-input)\*
- as effective constant current transmitter\*
- for different y-input signals

## 2.0 TECHNICAL DATA

Controller	
Nominal voltage	230 V (400 V, 500 V)~
Nominal current max.	25 A / 15 A / 6 A
Setting range voltage	20 - 220 V~ (40 - 380 V~)*
Max. current load of the heat conductor	0,2 s; 200 mA - 500 A*
Upstreaming fuses	2 X 80 mA
Current transformer output	25/1 A (6/1, 15/1); R <sub>i</sub> ... 1,5Ω
Input optocoupler	6 - 24 V, R <sub>i</sub> 5kΩ; disconnection according to VDE 0700
Auxiliary voltage	-21 V~, R <sub>i</sub> = 5kΩ
Dimensions**	Euroboard 100 x 160 mm; 14 TE, 3 HE
Excess length of cooling element***	+ 93 mm
Multipoint connector	DIN 41612 Form F; H***
Cassette** (h x w x d in mm)	150 x 85 x 232
Plug**	D15*
Temperature range	0 - 55 °C (cassette)
Cassette **** (h x b x t in mm)	157 x 93 x 205
Input y- signal Ex-i-y-signal	4 - 20 mA; R <sub>i</sub> ≤ 20Ω 4 - 20 mA; R <sub>i</sub> ≤ 20Ω EEx ia IIC Ex-90.C.2029

# Voltage controller SRS

## 3.0 TECHNICAL DESCRIPTION

### Display

Depending on requirements the display device can, for the purpose of improved reading of the operating current, be delivered with measuring range end value 26A, 15 A or 6 A. Current transformer output always 0 - 1 A.

### Switching input (Heating off)

The switching input via optocoupler is as standard designed for a voltage of 6 to 24 V~, alternatively for current input 1,5 to 20 mA

### Fuses

The voltage controller SRS has two fuses with 80 mA for the internal supply voltage.

### Current transformer output

The current transformer output is designed as transmitter for the current input of the temperature controller TRB-P.

### y- actuating variable input

Devices, which are equipped with this buffer amplifier, serve as correcting element for analog controllers. The output voltage has to be limited to the desired max. value by use of the potentiometer with voltage scale (serves as overload protection or for the limitation of the overshoots during the adjustment).

\* other measuring ranges on request

## 4.0 TYPE CODE

**SRS**

<b>1</b>	-	Standard version
	a	Only for contact control
<b>2</b>	6	Measuring range of display (A) 6
	15	Measuring range of display (A) 15
	25	Measuring range of display (A) 25
<b>3</b>	-	Nominal voltage 230 V (20 - 220 V)
	3	Nominal voltage 400 V (35 - 380 V)
	5	Nominal voltage 500 V (40 - 500 V)
<b>4</b>	K	Compact unit
	M	Modular device
	Me	Control panel for modular device
	Mke	Cassette part for modular device
	S	Plug-in unit
<b>5</b>	-	Input optocoupler
	y	Input 4 - 20 mA y- Signal
	xy	Input (0 - 1 V); 0 - 10 V; 0 - 20 mA; 4 - 20 mA
<b>6</b>	-	Standard version
	G	Constant current transmitter

#### Example:

Standard device, measuring range of display 6 A, nominal voltage 230 V, compact unit, with input optocoupler, without constant current transmitter
